

Rehan Sanadi

iOS Developer • Product Builder • Founder

WHY THE ACADEMY

I build products because I love turning everyday friction into something simple and human. In the past year I've shipped SwiftUI apps across **health, productivity, and food-tech**, placed **Top 17 at the OpenAI Buildathon**, won the **NxtWave Buildathon**, and was selected for the **Swift Student Challenge 2026**. The Apple Developer Academy's intensive, challenge-based, multidisciplinary 10-month program is exactly the environment I'm looking for — a place to go deeper on Apple platforms, learn beside designers and domain experts, and grow from someone who *builds apps* into someone who *ships world-class products*. I'm ready to commit fully.

ABOUT

Aspiring iOS developer and product builder from Ichalkaranji, India, currently in my B.Tech in Artificial Intelligence & Data Science. I design and build digital products end-to-end — from the idea and UX in Figma to shipping in SwiftUI — with a focus on real, everyday usefulness. Outside of code I'm a gold-medalist boxer, which is where I learned discipline, consistency, and how to keep showing up.

📍 Ichalkaranji, Maharashtra, India

LinkedIn in/rehan-sanadi

A multidisciplinary builder.

Tech, design, and domain — plus a competitive athlete's work ethic. Here's the toolkit and the track record behind the projects.

ACHIEVEMENTS

- **Top 17 Finalist** — OpenAI Buildathon Challenge
- **Winner** — NxtWave Buildathon
- **Participant** — Swift Student Challenge 2026
- **Gold Medalist** — Boxing Competition
- Active GitHub contributor — multiple shipped SwiftUI apps

EXPERIENCE

Neuroverse Software Solutions

Software Developer Intern · Jan 2026 – Present

- Build SwiftUI components and ship features for internal & client apps
- Collaborate through Git, pull requests, and code reviews
- Diagnose and resolve issues with Xcode debugging tools

TECHNICAL SKILLS

Languages — Swift, Java, C++, Python, JavaScript

iOS — SwiftUI, UIKit, MVVM, UserNotifications, REST APIs, JSON

Apple — Foundation, AVFoundation, Core ML, Apple Intelligence, Foundation Models

Tools — Xcode, Git, GitHub, Firebase, Figma, VS Code

EDUCATION

Sanjay Ghodawat University (NIAT)

Kolhapur, India · Jun 2025 – Present

- B.Tech in Computer Science Engineering (2nd Semester)
- Specialization: Artificial Intelligence & Data Science
- Coursework: OOP, Data Structures & Algorithms, Software Engineering

DISCIPLINES I BRING

Tech SwiftUI · Core ML · Apple Intelligence

Design UI/UX · Figma · HIG-driven interfaces

Domain Health · Productivity · FoodTech

Mindset Athlete's discipline & consistency

Projects.

Each project below is something I designed and built to solve a real, everyday problem.

01

Yumyoo

Smart Food Pre-Ordering Platform

FOODTECH · ENTREPRENEURIAL

A pickup-based food pre-ordering platform that cuts customer wait times and gives small restaurants without a website an instant digital storefront, menu, and ordering system.

TYPE & ROLE

Self-initiated · Founder — product design & iOS development

IMPACT

Reframes the queue problem around "order before you arrive," and lets local businesses digitize ordering without building a website.

WHAT I LEARNED

Two-sided marketplace product thinking, ordering/checkout UX, and scoping an MVP around one sharp problem.

TECH

SwiftUI · Figma · Product design

SwiftUI

Product Design

FoodTech

02

Hearly

AI Meeting Assistant · Chrome Extension

AI PRODUCTIVITY

An AI productivity tool that improves voice clarity and reduces background noise, so online meetings sound human.

TYPE & ROLE

Self-initiated · Product & AI experience design

IMPACT

Designed the experience around real-time voice clarity, drawing from modern collaboration tools to keep meetings focused.

WHAT I LEARNED

Designing for AI products, core audio-processing concepts, and browser-extension UX.

TECH

AI · JavaScript · Product design

AI

Audio

Chrome Extension

↗ github.com/Rehan0707

Projects.

Health-focused apps built natively in SwiftUI following Apple's Human Interface Guidelines.

03 Medic

Personal Health Companion

HEALTHTECH

A healthcare app for symptom tracking, medicine reminders, and health-record management, built to make staying healthy effortless.

TYPE & ROLE

Self-initiated · Individual project — sole designer & developer

IMPACT

Built reusable, scalable SwiftUI components on MVVM and integrated local notifications so users never miss a dose.

WHAT I LEARNED

MVVM architecture, the UserNotifications framework, and HIG-driven interface design.

TECH

SwiftUI · MVVM · UserNotifications

SwiftUI

MVVM

Notifications

04 Solace

Holistic Health & Vitamin D Tracker

WELLNESS

A wellness app that helps users track sunlight / Vitamin D exposure, hydration, and sleep through gentle, reminder-based daily habits.

TYPE & ROLE

Self-initiated · Individual project — sole designer & developer

IMPACT

Implemented reminder workflows and intuitive state management to help users build and keep healthy daily habits.

WHAT I LEARNED

State management in SwiftUI and designing for habit formation and behaviour change.

TECH

SwiftUI · MVVM

SwiftUI

MVVM

Health
